

SEE-CARE Laser Vision Correction Policies and Pricing

Thank you for having your laser vision correction with us. Laser vision correction (LVC) is not covered by insurance. We try to give you transparent and fair pricing for your procedure. Please read the following explanation of our prices prior to your procedure.

Procedure/item	Price	Notes
LASIK or PRK	\$2600 per eye	Included: pre-operative consultation and testing, surgery, post-operative visits as needed for one year, enhancement (retreatment) or other procedures if needed within one year.
Eye drops	Per your prescription plan or pharmacy	Normally you will need generic antibiotic and steroid drops after surgery, as well as artificial tears to treat dryness and irritation. We sometimes have samples.
Retreatment (original procedure performed by SEE-CARE)	\$0 if within 1 year of original procedure, \$1500 if later than one year from original surgery date.	Includes 180 days of post-operative visits, as needed.
Hospital or surgical center services, including anesthesia	Per your health plan	The need for hospital or surgical center services is very rare. We do not charge for our services if the problem is related to laser vision correction and within one year of the original LVC procedure. Charges for facility fees, anesthesia, and non-surgeon fees are your responsibility.

Please note:

- Prices may change without notice.
- Payment is due 1 week prior to your procedure. We refund fees promptly if no surgery is performed.
- We accept credit cards (including HSA cards), check, and cash.
- There are no guarantees as to the outcome of any surgery. We do not offer refunds for unsatisfactory outcomes.
- There is a fee for returned checks according to current SEE-CARE Terms and Conditions of Care (available at SEE-CARE.com).
